NEWS RELEASE **PRIVATE PLACEMENT OF 530,000 UNITS**

Dentonia Resources Ltd. ("Dentonia") announces that it has agreed to sell by way of a non-brokered private placement of 530,000 units at a price of \$0.06 per unit for a net proceeds of \$31,800.

Each unit consists of 1 common share and 1 non-transferable share purchase warrant (the "warrant"). The warrant is exercisable for a period of two years from the date of the issuance of the units. One warrant entitles the holder to purchase one additional common share at an exercise price of \$0.10 per share for the 1st year and at an exercise price of \$0.20 per share for the 2nd year.

The initial subscription proceeds of \$31,800 will be used to finance a preliminary exploration and prospecting program (week of September 13, 2004), on Dentonia's HY Property, Tintina Gold Belt, Southeast Yukon.

Earlier work has identified 2 areas with strongly anomalous gold geochemistry in soil and rock respectively, 1,400 by 100m and 900 by 350m, long and wide. Gold values as high as 144g/t in rock, and 1,259 (ppb) in soil have been recovered. Hostrocks are late Precambrian to Paleozoic metasedimentary rocks.

The aim of the current program is to confirm some of these values, and assess the possibility that these mineral occurrences are related to multistage veining and replacement style mineralization, similar to the large Murantau deposit in Uzbekistan, Central Asia.

The program will be under the direction of R. H. McMillan, Ph.D.
